## Projects

### Retroauta.com

- Website created as a portfolio and a platform for clients to present their offerings.
- Built using the React library.
- Features blog-like functionality, integrated with the Sanity CMS for client-managed content editing.
- First experience with rendering 3D models in a browser using react-three-fiber.

### React Scheduler

- Application designed for scheduling and managing meetings in a calendar.
- Built using the Material-UI library for a modern and responsive user interface.
- Provides various calendar views, including daily, weekly, and monthly layouts.
- Allows users to create, edit, and delete events with customizable details like title and description.
